My Career Planning Readiness

Completion Date November 15, 2010

Self Assessment Score
3.17

Self Assessment is the first and most important step in career planning and is used to identify occupations and major study areas compatible with your personal attributes. Your *medium* self assessment score indicates that you are moderately involved in examining your interests, values, personality, and skills. It is important that you stay actively involved in self assessment because finding a satisfying career path begins with knowing yourself.

Career Exploration Score
3.33

Career Exploration is important because learning about types of jobs, educational requirements, and job functions will help you to identify occupations that appeal to you. Your *medium* score indicates that you are moderately involved in career exploration. It is important that you continue or increase your involvement in career exploration because it will help you narrow down your options and map out your career goals. Exploration should be ongoing because new career paths are constantly unfolding, traditional ones are changing and shifts may be taking place in skills and educational requirements.

Career Planning Satisfaction Score
3.83

Career Planning Satisfaction measures the extent to which you are satisfied with the results of your career planning activities and your ability to resolve problems that can interfere with your decision making. Your *high* score suggests you are not experiencing any problems with your career planning. If at any time you do encounter any problems, you should consider discussing them with your career counselor.

Conventional
The Organizers

People in the conventional category often prefer orderly, systematic work. Work tasks often include keeping records, and organizing written and numerical materials according to a plan. They like to see things run efficiently and smoothly, which means they will pay attention to administrative details. They generally enjoy keeping accurate records, organizing, working with numbers, and using a computer.

Investigative The Thinkers

People in the investigative category often have a strong desire to understand cause and effect, and solve puzzles and problems. They often work in jobs that are scientific in nature. Their work often involves the analysis of data, using formulas, graphs and numbers. Investigative types typically prefer to work independently, and with minimum supervision. People in this category generally enjoy using computers, solving math problems, interpreting formulas, and thinking abstractly.

Realistic The Doers

People in the realistic category often prefer to work with objects and things. They are likely to enjoy creating things with their hands and using tools and machines. Some prefer large, powerful machines like tractors, while others prefer precision machinery such as X-ray or electronic equipment. People in this category generally enjoy being physically active, repairing equipment, rebuilding cars, fixing electrical things, solving mechanical problems, playing sports, working outdoors, and using their hands.
